Report -
B

DCI/IC/1214/75

7 August 1975

MEMORANDUM FOR: General Wilson

SUBJECT : Interagency Intelligence Reporting:
Soviet Dependence on Space Systems

REFERENCE : D/DCI/NIO Memo dated 5 August 1975,

25X1

1. Reference memo forwarded final draft of subject report to USIB representatives and announced the clean-up session for 8 August.

2. We have reviewed this final draft and find that it responds well to our originally perceived requirements as relayed to the NIO/SP.

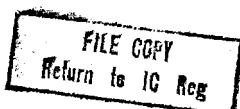

3. The report is one of the best compendiums of Soviet space systems we have seen and will probably stand as such for some time to come. In addressing the question of Soviet dependency, however, this draft has introduced the concept of degradation as part of the overall dependency concept. We appreciate the many hours of work put in by the authors which no doubt lead to this but we nonetheless feel that it adds an unnecessary confusion.
